Our Vision

Mersin University, Faculty of Pharmacy, is to demonstrate outstanding performance in education, training, research, development, production, and pharmacy service. We aim to educate pharmacists who are skilled in research, possess analytical thinking, embrace innovation, and utilize their knowledge and skills for the betterment of society. We prioritize effective communication with both internal and external stakeholders, and endeavor to engage in activities that bolster professional unity. Our vision is to become a pioneering Faculty that integrates students, graduates, employees, and society through lifelong learning. We are committed to patient-centered education and uphold academic and ethical values. We aspire to attain national and international recognition and remain open to innovation, while fostering a strong corporate identity. Through our educational and training programs at national and international levels, we aim to generate knowledge and technology.
